Dr. Stephan Howden is a Physical Oceanographer and has been teaching in the Hydrographic Program at the University of Southern Mississippi since 2000. He received a B.S. in Physics from the State University of New York at Buffalo in Buffalo, NY; an M.S. in Physics from Michigan State University in East Lansing, MI; and a Ph.D. in Oceanography from the University of Rhode Island in North Kingston, RI. Dr. Howden is currently an Associate Professor in the Department of Marine Science, and his publications include microwave remote sensing, the Integrated Ocean Observing System, ecosystem monitoring, mesoscale ocean variability, hydrographic science and precise positioning. Dr. Howden is the Director of the Central Gulf of Mexico Ocean Observing System and he serves on the Board of Directors of the Gulf of Mexico Coastal Ocean Observing System, as a member of the Steering Committee for the Gulf of Mexico Coastal Acidification Network, and as a member of the IOOS High Frequency Radar Working Group. He was a member of the Program Advisory Committee for the Ocean Observatories Initiative, from 2013 until it ended in 2015.
